

COMMANDER PRO

445

The Commander Pro "Tiller" was designed to have all the attributes of the Commander Range including tough build strength, exceptional ride, and above all else, "fishability". With its wide and long casting decks and low windage, this boat is not only built for the hardcore, it's also built for the sports -fisherman.

The main difference is the 445 Commander Pro was purpose designed as a tiller steer. In the right hands, the tiller version offers extreme manoeuvrability. If you fish the runoff up north or a twisting turning shallow water estuary's, or even if you just want to fish in a simple uncluttered deck space, the Commander was purpose built for you.

If you like the layout and would like it as a side console, no problem! Just ask your local friendly Makocraft dealer, they will only be happy to oblige.
